

SPECIFICATION OF GPS MARINE USER PACKAGES

	BASIC	BASIC+
BASIC FUNCTIONALITIES		
ON-LINE object monitoring	•	•
Basic information (speed, altitude, exact time, exact geo location)	•	•
GPRS data transfer via SIM data card	•	•
Alarms according to selected criteria and available data	•	•
Sending notifications to E-mail	•	•
Mobile version of the app	•	•
User support	•	•
CARTOGRAPHY		
Use of vector cartographic databases and GIS layers: Google (Street, Terrain, Satellite, Hybrid), OpenStreetMap, Bing (Road, Aerial, Hybrid)	•	•
Insight into 3D locations via Google Street View	•	•
Enter geozones, markers and routes	•	•
Display of traffic jams directly on the map	•	•
MOVEMENT OVERVIEW		
Complete data archive (movement history 365 days)	•	•
Telemetry display of speed / altitude	•	•
Telemetric display of other sensors (fuel, temperature ..)	○	○
TEXTUAL REPORTS		
Basically	•	•
Current conditions	•	•
Driving and stopping	•	•
Speeding	•	•
Entry / exit from the zone	•	•
Events, service	•	•
Refueling / theft	○	○
Sensors	○	○
Driver behavior	○	○
GRAPHIC REPORTS		
Speed	•	•
Height	•	•
Ignition on / off	•	•

This specification represents the basic functionalities of an individual package.
 Packages can be further expanded with the functionalities listed when contracting the service.

Valid from: 1.10.2020
 ALFA LOGISTIKA Ltd.

Fuel level	○	○
Temperature	○	○
Sensors	○	○
TELEMETRY		
OBD telemetry	–	–
ECO data	●	●
DTC Data	–	–
SENSORS		
Driver identification	○	○
Temperature	○	○
Fuel	○	○
Digital sensors	○	○
Analog sensors	○	○
Flow sensors	○	○
Axle load sensors	○	○
ADVANCED MODULES		
Vehicle service management	●	●
Automatic email reporting (daily, weekly)	●	●
LEGEND
